From Apple

3. 1.1 Business: Payments - In-App Purchase

Hello,

Thank you for your attention to this matter. While looking over your app in regard to the general SDK usage, we found additional signs above and beyond their mere inclusion that justify App Review's continued concern. For example, a new class to this app in the most recent version, XDAliPayResponse, appears to be set up specifically for handling AliPay order IDs, which appears entirely apart from their login functionality.

Of greater concern, the code of class XDAppConfig includes several payment-based methods and properties alongside bind_alipay_switch, such as commission_billing_agreement_url, commission_cash_agreement_url, and poker_play_config. Similarly, XDAppConfigManager contains isApplnReview, a new isInviteSwitchOpen property, billingAgreementUrl, showBindAlipayTip, and shouldShowBindAlipayTip. XDHttpRequestManager's XD_combinePayUrl: method, meanwhile, is joined by new methods sendAlipayPurchaseRequest:finish:failure: and sendAlipayPurchaseResultRequest:resultStatus:resultInfo:finish:failure:.

Given this track record, it would be appropriate to remove any and all signs of non-compliant purchasing functionality from your app code. If that means some SDK usage will not bring you into compliance, then they cannot be used. We look forward to reviewing your revised app.

Best regards,

App Store Review

另外，App Store上面很多的app集成了微信的授权和分享功能，我们了解的应用中，大部分使用了跟我们项目中同样的SDK是否也意味着他们的应用也不能通过审核？

我们需要使用微信的分享和授权登录，需要使用微信SDK，但微信SDK本身包含支付功能部分代码（我们的app并没有使用），支付宝SDK也是一样的情况。
请问我们该如何在继续使用该SDK的情况下（不使用其支付功能）避免被认定为接入了第三方支付？

From Apple

Guideline 3.1.1 - Business

Hello, thank you for your resubmission. However, upon re-review, we still noticed that your app enables the purchase of content, services, or functionality in the app by means other than the in-app purchase API, which is not appropriate

for the App Store.

Specifically, this app's inclusion and connection to the AliPay and WeChat Pay SDK is the cause of its repeated rejections. It would be appropriate to remove all code-level, asset, network, and metadata references to AliPay or WeChat Pay before resubmitting for review

Next Steps

While the payment system that you have included may conduct the transaction outside of the app, if the purchasable content, functionality, or services are intended to be used in the app, they must be purchased through IAP, within the app - unless it is of the type referenced in guideline 3.1.3 of the App Store Review Guidelines.

Request a phone call from App Review

At your request, we can arrange for an Apple Representative to call you within the next three business days to discuss your App Review issue. Our representative will be able to discuss the issue in English or Chinese.

To request a call and ensure we have accurate contact information, reply directly to this message with a contact name and direct phone number to reach you.

申请应用审核团队致电联系

如果您有需要，我们将根据您的要求在三个工作日内安排一位精通中文的苹果公司代表致电与您联系，讨论您的应用审核结果。

为了确保我们有正确的联系资料，请回复这封邮件并提供您的姓名与电话号码。

申請應用審核團隊致電聯繫

如果您有需要，我們將根據您的要求在三個工作日內安排一位精通中文的蘋果公司代表致電與您聯繫，討論您的應用審核結果。

為了確保我們有正確的聯繫資料，請回覆這封郵件並提供您的姓名與電話號碼。
