## 2. 1 Performance: App Completeness

---

### Guideline 2.1 - Information Needed

We were unable to sign in to review your app with the demo account information you provided.

We have attached a screenshot of the error message displayed when we attempted to sign in.

### Next Steps

To help us proceed with the review of your app, please provide a user name and password in the App Review Information section for your app in iTunes Connect. Please be sure to include content in your app that demonstrates the features and functionality available in your app.

To provide demo account information:

- Log in to iTunes Connect
- Click on "My Apps"
- Select your app
- Click on the app version on the left side of the screen
- Scroll down to "App Review Information"
- Provide information in "Demo Account" and/or "Notes" as appropriate
- Click "Done"
- Once you've completed all changes, click the "Save" button at the top of the App Version Information page.
- Reply to this message to confirm the availability of a valid demo account and we will continue the review.

While your iTunes Connect status shows as Metadata Rejected, we do not require a new binary to correct this issue. Once this information is available, we can continue your review.
