From Apple

3. 1.1 Business: Payments - In-App Purchase

Hello,

Thank you for your response.

Guideline 3.1.1 - Business

We noticed that your app enables the purchase of content, services, or functionality in the app by means other than the in-app purchase API, which is not appropriate for the App Store.

Specifically, this app's inclusion and connection to the AliPay and WeChat Pay SDK is the cause of its repeated rejections. It would be appropriate to remove all code-level, asset, network, and metadata references to AliPay or WeChat Pay before resubmitting for review.

Next Steps

While the payment system that you have included may conduct the transaction outside of the app, if the purchasable content, functionality, or services are intended to be used in the app, they must be purchased through IAP, within the app - unless it is of the type referenced in guideline 3.1.3 of the App Store Review Guidelines.

Request a phone call from App Review

At your request, we can arrange for an Apple Representative to call you within the next three business days to discuss your App Review issue. Our representative will be able to discuss the issue in English or Chinese.

To request a call and ensure we have accurate contact information, reply directly to this message with a contact name and direct phone number to reach you.

申请应用审核团队致电联系

如果您有需要，我们将根据您的要求在三个工作日内安排一位精通中文的苹果公司代表致电与您联系，讨论您的应用审核结果。

为了确保我们有正确的联系资料，请回复这封邮件并提供您的姓名与电话号码。

申請應用審核團隊致電聯繫

如果您有需要，我們將根據您的要求在三個工作日內安排一位精通中文的蘋果公司代表致電與您聯繫，討論您的應用審核結果。

為了確保我們有正確的聯繫資料，請回覆這封郵件並提供您的姓名與電話號碼。

We look forward to reviewing your resubmission.

Best regards,

App Store Review

From Apple

Hello Mr. Liu,

RE: Call ticket: 1694056

Thank you for your time during our call today.

As we discussed, your app was found to be out of compliance with App Store Review Guidelines.

Guideline 3.1.1 - Business

We noticed that your app enables the purchase of content, services, or functionality in the app by means other than the in-app purchase API, which is not appropriate for the App Store.

Specifically, your app enables points, or intermediate currencies, without using the in-app purchase API. Additionally, please note that the cost of the points or the intermediate currency cannot be included in the purchase price of the app.

Next Steps

While the payment system that you have included may conduct the transaction outside of the app, if the purchasable content, functionality, or services are intended to be used in the app, they must be purchased through IAP, within the app - unless it is of the type referenced in guideline 3.1.3 of the App Store Review Guidelines.

We hope you will consider making the appropriate revisions to your app and resubmit.

For code-level assistance, please consult with [Apple Developer Technical Support](#). Based on your app, please be sure to include any symbolicated crash logs, screenshots, or steps to reproduce the issues encountered.

If you feel that this rejection was made in error, and believe your app is in compliance with the App Store Review Guidelines, you may submit an appeal to the [App Review Board](#). Once the App Review Board has completed their evaluation, they will contact you directly with the decision.

If you have any questions about this information, please reply to this message via Resolution Center on iTunes Connect. If you would like to discuss the review findings in more detail, please reply to this message via Resolution Center on iTunes Connect or feel free to contact me at +1 (669)-227-5527 between 11am - 8pm Pacific Daylight Time.

Thank you,

Zheni
